PROFILE

Result-oriented Backend Developer with strong experience in **Node.js**, **Express.js**, and **MongoDB**. Adept at designing scalable RESTful APIs, integrating third-party services, and managing secure authentication and database logic. Experienced with production-ready backend solutions, real-time integrations, and team-based deployment workflows. Portfolio: huzaifa-iqbal.com

WORK EXPERIENCE

Backend Developer (TypeScript + Node.js)

Vconekt | May 2025 – Present

- Built backend infrastructure for AI-driven projects using Node.js and TypeScript
- Developed REST APIs with role-based access and JWT/OAuth logic
- Integrated OpenAI/Gemini and custom webhooks for real-time event handling

Backend Developer (MERN Stack)

Mehdi Technologies | Sep 2024 – March 2025

- Developed backend APIs and services using Express.js and MongoDB

- Designed database schemas with Mongoose and optimized queries
- Implemented Telegram Bot integrations and webhook endpoints
- Handled backend deployment and version control using Git

Backend Developer (API Integrations)

Prime Valley USA (via KGT Globals) | Aug 2023 – June 2024

- Managed backend logic for dashboard apps and client tools
- Integrated third-party APIs and managed data flows via Express
- Participated in full-stack delivery with focus on backend performance

SKILLS

Languages: JavaScript (ES6+), TypeScript

Backend: Node.js, Express.js, REST APIs, Webhooks

Database: MongoDB, Mongoose, SQL, PostgreSQL, Aggregation Pipelines

Auth: JWT, OAuth (Google, Apple), Role-based Access

DevOps & Tools: Git, GitHub, Railway, Postman, Vercel

Other: Telegram Bot API, Gemini API, OpenAI, Cloudinary, Multer

Soft Skills: Problem Solving, Ownership, Communication, Collaboration

PROJECTS

◆ VoiceConAI (Backend) *(In Progress)*

Webhook backend to manage call events, logging, and transcripts.

Tech: Node.js, Express.js, MongoDB, Postman, Git

◆ Talenta AI (Backend) *(In Progress)*

Modular backend for an AI talent intelligence platform.

- Built secure API layers with JWT + role management
- Connected AI APIs (Gemini, Claude, Qwen) for smart scoring
- Aggregated analytics and dashboard data with Mongo pipelines

◆ **NeuroThanks AI Suite (Backend)**

Node.js-based backend for handling multi-model AI requests.

Tech: Node.js, Express.js, MongoDB, Cloudinary

🎓 **EDUCATION & CERTIFICATIONS**

School Education – Matriculation (Science) (*Passed in 2022*)

Govt. Degree College – Intermediate (Pre-Engineering) (*2022–2024*)

Aptech, Karachi – Diploma in Web Development (*2022–2023*)

Certifications:

- WordPress Development – DigiSkills (2023)
 - Freelancing – DigiSkills (2023)
 - SEO – DigiSkills (2023)
 - Graphic Designing – Enablers (2022)
 - English Certificate – Domino Institute (2022)
 - Taleem-ul-Quran – Alhuda (2025)
-

🌐 **LANGUAGES**

- English, Urdu
-

Goal: To build secure, scalable backend systems and become a lead backend or platform engineer.
